

Mr. Revi Manaloor
General Secretary
Manaloor Kudumbam

Letter from Gen. Secretary

Dear All,

26th Jan 2016

“Greetings to all in the Family”,

We have great pleasure to see that a website for our Manaloor Family, a long cherished wish of all of us, is now being fulfilled on this great day. Through this venture we are transforming our great values of our family to the new generations and the generations yet to come. Of course, this is a great link to connect every member of our family in one thread, the thread of unison, of understanding and of maintaining the goodness and cult of our great family that our forefathers have built years ago through their valuable prayers and blessings that each one of us should cherish and thank God for the gifts he has showered upon us all through these years.

This website would help highly to build an ongoing relationship between each member of the family and also renew old and lost connections. The core value of family relation and ties, lies in the unity and love, the pride we can carry with each one of us forward to the next generation is to gift to our children, that history has proved to connect with prayers more firmly our faith upon God.

Our family has its main root in Kerala, many of our present day youngsters and new families are not familiar to their valuable heritage or do not have any idea of their ancestry. Many have memories and contacts limited to two or three generations consisting of grandchildren to grandparents. Though we have wide network of contacts and activities in our daily life, we hardly meet or interact with our own close relatives. In a busy and competitive life schedule, many of our members do not get the opportunity of attending Kudumbayogam or familiarize with others.

This website is mainly meant for those members living away from their forefathers land and have settled in various other places. With this website, we are trying to provide a common platform to all family members to share their knowledge, skills, views, information and concerns with others.

We anticipate more involvement and participation of our youngsters as well as family members of any age group. Please make use of this website to develop a better interpersonal relation and a very strong family bond among the family members living all over the world even though having not seen each other ever since years.

Family members can use this site for announcements about special occasions through the contact us link. We are very fortunate, especially our youth of our family, so they use this modern means of communication.

The data base and the family tree, would be complete only through our individual co-operation and support and the present data that is seen is only through the data collected and what we had in hand through the last book printed in 1965. So do kindly send in your family details through the log in page and also to connect the relation kindly send an email to the official mail given so as to know the exact relation

Let us strengthen our Family Values by.....

- 🌟 **Thinking together** How we address challenges and opportunities is through by Thinking together. We all participate in "thinking together, for a change." Being a good listener is essential in the communication process. Listening displays respect.
- 🌟 **Praying together** Christ says "anything" "if two of you agree on earth about anything they ask . "(Matthew 18:19). There is added power when we unite with brothers and sisters in Christ to join our hearts and make our collective requests to our Heavenly Father.
- 🌟 **Sharing together** We stick together as a family, we share the pain, we share the success, we share the joy and everything.
- 🌟 **Glorifying together** The way we speak to others and about others should be glorifying to God. Glorifying each person's ideas and talents are valid. It shows family members you care about what concerns them.

Hoping that this brings blessings and wishing each and every member in our family success.

With prayers.

-Sd-
Revi Manaloor,
